I toss this in... that I do NOT find a type 307 in my 1946 RCA TUBE HANDBOOK. I DO find a type 304TH and the data sheet is marked as Preliminary.

I'd like to buy a 10 giga Hz transistor suitable for an LNB for a satellite dish. Its code number is ATF-13135. It doesn't seem to be possible to buy single items of this sort - the Australian distributor will only sell in bulk. Would some kind soul in the US have one for sale. Alternatively, the fax number of a store in the US would be helpful.

Thanks,  
Ian Rowe

Take a look for numbers in a date format either  
in the markings on the glass or scratched on the  
plate. That gives an idea as to how old the tube  
handbook needs to be for it to be listed.

Are these Amprex tubes, btw.
